## **INFORMATION**

I am a highly skilled full-stack developer with a solid foundation in building responsive, dynamic web and mobile applications. On the front end, I work with modern frameworks like React.js, Next.js Vue.js to create intuitive and engaging user interfaces, optimize performance, and ensure smooth experiences across different platforms.

Equally proficient in back-end technologies, I have extensive experience with Node.js, NestJS, and PHP Laravel. This enables me to efficiently manage both front-end and back-end development, ensuring that all aspects of the project, from server-side logic to database integration and API design, work seamlessly together to create robust, scalable applications.

I thrive in collaborative environments, transforming ideas into highly functional and visually appealing products. I continuously stay updated with the latest trends and best practices in full-stack development, ensuring that the solutions I deliver are both innovative and reliable.

## **OBJECTIVE**

Seeking a Fresher or Junior Full-Stack Developer role to strengthen my skills in both front-end and back-end development. In the short term, I aim to improve my ability to create responsive, user-focused web interfaces using technologies like React.js, Next.js and Vue.js, while simultaneously developing my back-end expertise with frameworks such as Node.js and PHP Laravel. My long-term goal is to contribute to innovative full-stack projects, applying a comprehensive understanding of both client-side and server-side development.

#### **WORK EXPERIENCE**

# HD TECHNOLOGY GROUP JOINT STOCK COMPANY (HD Tech)

10/2023 - Now

#### **FREELANCER**

8/2023 - Now

#### **FULLSTACK DEVELOPER**

Over one year of experience as a Full-Stack Developer at an outsource company, contributing to 4-5 projects across various industries. Responsibilities included developing responsive and user-friendly web applications using HTML, CSS, JavaScript, and modern front-end frameworks, as well as handling server-side development with Node.js and PHP Laravel. Collaborated with designers, and clients to implement features according to project requirements. Focused on writing clean, efficient code, ensuring cross-browser compatibility, and integrating APIs and databases. Actively participated in code reviews and team meetings to improve overall project quality.

#### **FULLSTACK DEVELOPER**

Experienced in directly communicating with clients to understand their needs, adjusting project requirements, and delivering tailored, responsive web solutions. Skilled in managing client expectations and ensuring timely, high-quality results through clear, proactive communication.
